Introduction

The purpose of this document is to provide a high-level technical overview of the Rider Token Technology. The information in this document is intended for informational purposes only. RTN may make improvements or changes to the products, architectural design, or programs described in this document at any time without notice.

Digital currencies are often called cryptocurrencies due to the intricate technical details related to cryptography. Cryptocurrencies represent the next level in the evolution of money. The technology behind this new form of money called blockchain. It is entirely driven by math and is completely decentralized. The major underlying problem is that traditional financial institutions and the related governing and operating regulations are not well aligned with cryptocurrencies

The cryptocurrency in today's world is growing rapidly. But still the cryptocurrency is not acceptable in whole world.

RIDER TOKEN

Cryptocurrency is a form of digital money that is designed to be secure and, in many cases, anonymous. In Other words a digital currency in which encryption techniques are used to regulate the generation of units of currency and verify the transfer of funds, operating independently of a central bank.

RIDER TOKEN

Today cryptocurrencies have become a global phenomenon known to most people. While still somehow geeky and not understood by most people, banks, governments and many companies are aware of its importance.

In 2018, you'll have a hard time finding a major bank, a big accounting firm, a prominent software company or a government that did not research cryptocurrencies, publish a paper about it or start a so-called blockchain-project.

Fraud: Cryptocurrencies are digital and cannot be counterfeited or reversed arbitrarily by the sender, as with credit card charge-backs.

Lower Fees: There aren't usually transaction fees for cryptocurrency exchanges because the miners are compensated by the network

Immediate Settlement: Purchasing real property typically involves some third parties (Lawyers, Notary), delays, and payment of fees in traditional currency, but cryptocurrency is fast and reliable.

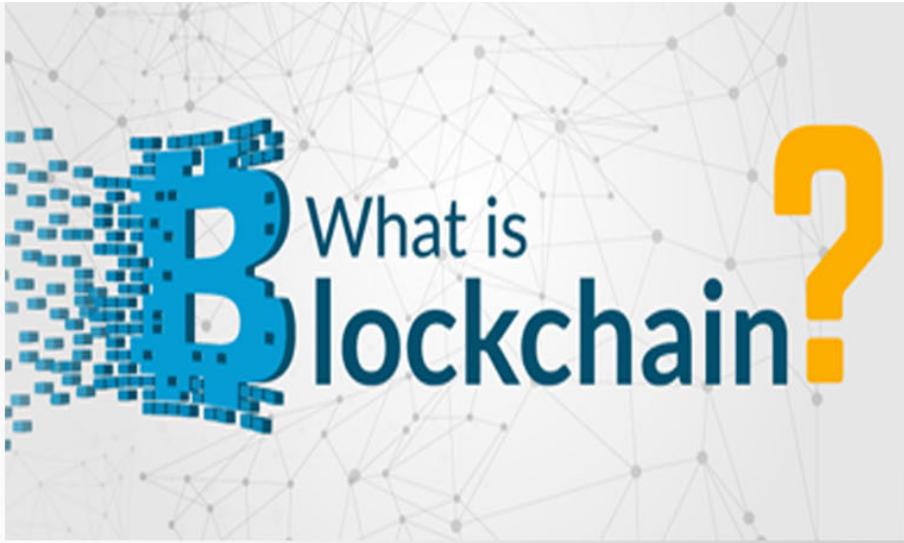

Access to Everyone: There are approximately 2.2 billion individuals with access to the Internet or mobile phones who don't currently have access to traditional exchange, these people are primed for the Cryptocurrency market.

Decentralization: A global network of computers use blockchain technology to jointly manage the database that records Bitcoin transactions. That is, Bitcoin is managed by its network, and not any one central authority.

Recognition at universal level: Since cryptocurrency is not bound by the exchange rates, interest rates, transactions charges or other charges of any country; therefore it can be used at an international level without experiencing any problems.

RIDER TOKEN

A blockchain is a digitized, decentralized, public ledger of all cryptocurrency transactions. Blockchain technology created the backbone of a new type of internet. Originally devised for the digital currency, Bitcoin, the tech community is now finding other potential uses for the technology.

It represents an innovation in information registration and distribution that eliminates the need for a trusted party to facilitate digital relationships.

Currently, the technology is primarily used to verify transactions, within digital currencies though it is possible to digitize, code and insert practically any document into the blockchain.

WHAT IS ERC 20

ERC stands for Ethereum Request for Comments. This is an official protocol for proposing improvements to the Ethereum network. '20' is the unique proposal ID number. ERC20 defines a set of rules which need to be met in order for a token to be accepted and called as 'ERC20 Token'

the ERC-20 defines a common list of rules for all Ethereum tokens to follow, meaning that this particular token empowers developers of all types to accurately predict how new tokens will function within the larger Ethereum system.

Rider Token launched on 1st January 2018. Rider token is basically based on ERC-20 Technology, which is the best technology Till date we have 20 founder members with thousands of customers. It is increasing very fastly.

A sum of total 20 crore coins will be produced. Total 5 crore coins will be supplied to market. It can be increased depending on the market demand

RIDER TOKEN

2019

1. Windmill Project

Our next projects is ralated to windmill, to produce energy using air.

2019

1. Solar Energy Project

Our next projects is solar energy plant, to produce energy using solar power.

RIDER TOKEN

2020

1. Farming Project

Our another projects is for farming.

RTN is based on the principle of blockchain technology that is changing the fundamental structure of not only our economy and banking systems, but also the way we connect and engage as human beings. As we move further into a world that fully implements the utility of blockchain technology, new opportunities to create sustainable independent communities emerge.

We want to make digital world. It's fast as soon as payment method.
By promoting cryptocurrency we want to promote digital currency in world
By providing digital payment gateway, we are working on the hassle-free world of money.

RIDER TOKEN

The energy crisis is a broad and complex topic. Most people don't feel connected to its reality unless the price of gas at the pump goes up or there are lines at the gas station. The energy crisis is something that is ongoing and getting worse, despite many efforts.

The reason for this is that there is not a broad understanding of the complex causes and solutions for the energy crisis that will allow for an effort to happen that will resolve it.

Energy crisis is making bad impacts and destroying the economy We want to find supplementary and

alternate energy sources to cut down the load on the national energy mix. We select different areas and conduct our research and find the best possible renewable energy sources.

Now we want to work in the field of Solar Energy. We are making projects related to solar energy and want to produce solar energy at large level.

For this we are hiring large farms and places and providing our technical as well as mechanical equipments there to produce enerv.

Through cryptocurrency we want to serve humans in the field of energy. this is our major mission for world.

Modern farming technology is used to improve the wide types of production practices employed by Farmers. It makes use of hybrid seeds of selected variety of a single crop, technologically advanced equipment and lots of energy subsidies in the form of irrigation water, fertilizers and pesticides.

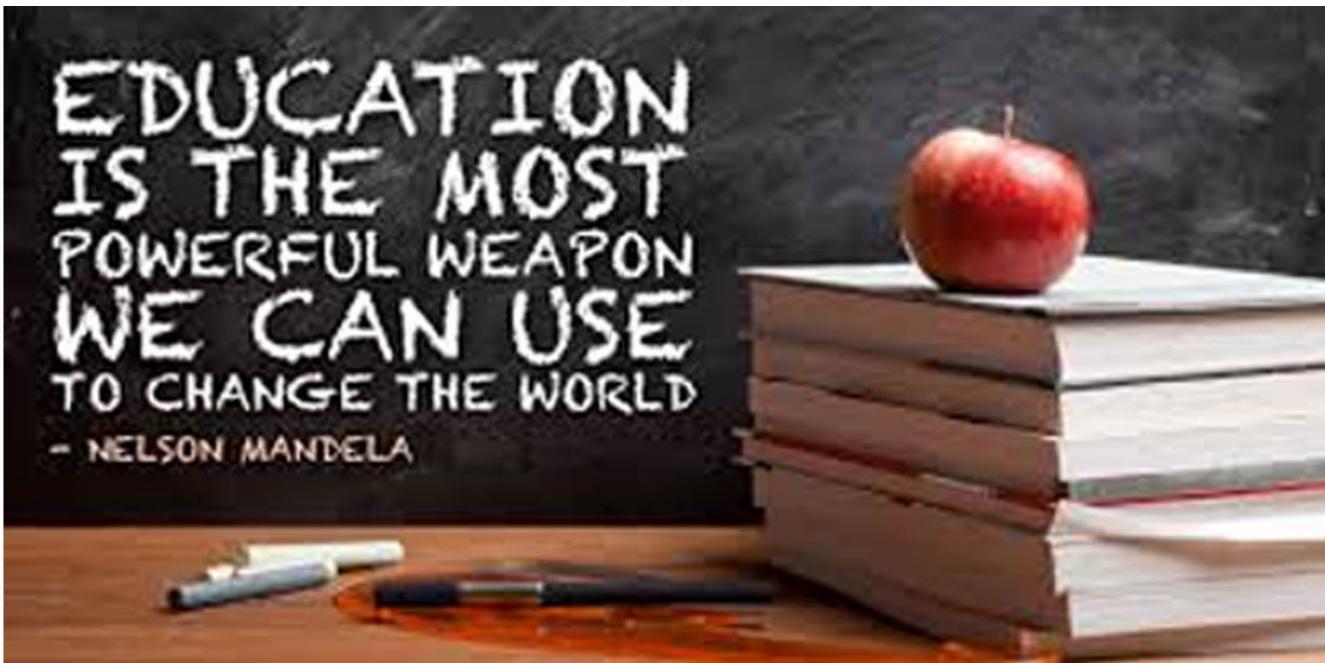

RIDER TOKEN

Modern farming methods increase the production in almost every sector. Using modern agriculture and farming is a must because modern farming methods can increase production and can feed the world.

So, we have tried our best to use some possible ways of earnings through farming business. Through farming business we can not only ensure food source but also can ensure a better life. We have launched in the concept of modern farming methods.

RIDER TOKEN

Lack of education is root cause of poverty. A sad misconception pervades our city: that Rochester's urban students cannot be educated until we have solved the problem of poverty. ... Believing that poor children can't learn merely leads to paralysis. The root cause of poverty is lack of education.

Education is not a finite process. It is not initiated at the morning bell and terminated at dismissal. It does not begin after Labor Day and end in June. And it most definitely does not start on the first day of Kindergarten and end on graduation day.

So, we have tried our best to use some possible ways of improving our education system by providing good education to students with the knowledge of technical points.

Our main focus will be on improving education system for poor people for betterment of our society

RIDER TOKEN

REFERRALS

In Rider Token about 20 crore coins will be produced and only 5 crore coins will be introduced to market in starting. In RTN there is a refferal scheme, in which on the joining of any customer, a refferal code will be generated. Using this code, that Customer can bring more customers to the RTN. On this, some refferal coin well be granted to his account. The best reffer and earn coin technology is with us.

RIDER TOKEN

Cryptocurrencies are a subset of alternative currencies or specifically of digital currencies which uses encryption techniques to regulate the generation of units of currency and verify the transfer of funds, operating independently of a bank.

Rider Token is getting best support from the customers in pre-booking. The future with RTN is safe and wealthy.
