Payment Partner

Meet BitGo ,The Most Popular & Trusted by Market Leaders. We are using BitGo as payment service partner. BitGo Enterprise enables safe, easy commercial Bitcoin transactions. with using BitGo we developed different unique wallets for every single user for each cryptocurrency.

Best thing about users wallet is that, in deposit and withdraw Section there is not just coin addresses you are seen, there is an unique wallet for each crypto currency for every user. Your dashboard wallet API is Connected live with BitGo wallet. it means Balances of your cryptocurrency showing live from BitGo API and we can't take it. that's how we do not carry users deposit & funds. All your deposit goes to your unique wallet . thus, your funds are always safe on your hands. you can conclusion how Its clearly transparent thing for your funds. none of other platform out there providing facility like this. it takes a lot of hard work and many months to develop this facility for our users. We believe that your funds should be only yours from starting to forever.

Below are some market leaders who choose BitGo to solve today's most complex business challenges in the digital currency market. you can also find this list on BitGo.

About Starlight Coin

The crypto currency market is growing exponentially. As more number of people are fueling the speculations revolving around the abstract currencies, the market now seems headed towards a more authentic future.

We are proud to announce the birth of a new cryptocurrency creating its own niche; The Starlight Coin. The pillars of creation sent a distant light down in order to give rise to Starlight coin, a breakthrough in crypto tech.

StarLightCoin is bone of StarLight Platform. StarLight Coin is a highly secured Peer-to-Peer advanced cryptocurrency.

StarLight coin aims to conduct secured and fast transaction using advanced Blockchain technology with seamless transfer-of-ownership. This is what makes Starlight coin stand out when compared to other cryptocurrencies.

By Using StarLight Coin Our platform allows user to use Six Major Cryptocurrencies Bitcoin , Ethereum Litecoin , Ripple , Bitcoin cash and Bitcoin Gold as a Payment Method.

Our aim is an open & transparent system with wide range of payment option unlike other platform. StarLight definitely a game changer when it comes to Payment gateways and Investment option.

Why choose Starlight coin?

The fact that Starlight coin is in its infant stage, give it ample of space to grow. Cryptocurrency has great potential for the future and Starlight coin has been engineered to reap optimum benefits.

Transparent

The technology behind Starlight coin is transparent, open and available for anyone to know. All transactions are recorded after hashing on a block. StarLight Coin have goal to create transparency in every stage of progress.

Highly Secured

With Blockchain technology being the backbone of Starlight coin, there is zero risk to no risk when it comes to fraud or hack. Strictly hashed transactions cannot be decrypted or viewed by anyone except the owner.

Stable

With thorough research, analysis, and development our team of programmers have developed this coin in order to ease the process of future cryptocurrency transactions. With clear roadmap and market capital, Startlight coin aims at being stable with less fluctuations and greater profits.

Secured ICO investment opportunity

StarLight Coin comes with Buy with Confidence program and this program allows users to buy SLC with secured way. We aim to create honest platform by providing this facility.

Seamless Crypto Payment Solution

Our strong and secured payment gateways ensure that cryptocurrency payments are up and running 24x7. Accept and send multiple cryptocurrencies through our seamless payment solution.

BlockChain Technology

Blockchain can be called as a distributed database. All the cryptocurrency transactions are stored and recorded on the block. These blocks use state-of-the-art cryptography which makes them impossible to hack or decode. Multiple such blocks stitched together forms a blockchain,

The inception of Starlight coin gives a head-start to potential investors since they can buy the initial coins at a lower price.

StarLight Platform

What is StarLight Platform?

A smart and multipurpose payment platform developed by High-tech StarLight developers , StarLight offers Professional investment and trading along with a secured payment gateway. This unique innovation where both these features are brought under one roof makes it the platform of choice for everyone. You can not only save payment gateway fees by using StarLight coin, the backbone of the StarLight but also use it as a utility currency for investing in powered staking program. Moreover the user is paid dividends from trading gains and payment gateway fees on a daily basis in proportion to the amount being invest.

1. StarLight Payment Gateway

StarLight is a decentralized payment platform that supports multiple cryptocurrencies with the goal to significantly reduce the no. of intermediaries involved in a transaction and boost the usage of cryptocurrency on a regular basis. The payments have high encryption, thanks to the blockchain ecosystem making them far more secure than conventional digital payment methods. It promotes global transactions in multiple cryptocurrencies between suppliers, distributors, businesses, and consumers, at a fraction of the cost.

Current Market Problems & Its Solution

So why choose StarLight over the thousands of other fiat currency based payment gateway choices in the market? Due to following reasons mainly:

- High transfer fees
- Involvement of third party in payment system
- High security maintained but human mistakes makes it vulnerable to hackers
- Many payment gateways can freeze your amount when they want, using their hidden terms and conditions
- There are high account setup costs followed by high fees post setup.
- Limitations in terms of geographical coverage
- Recurring billing on account setup costs

At present the numerous payment firms are based on blockchain systems. It depends on peer to peer payment transfers with proof of security. Such security isn't possible with the current infrastructure in place. This is where StarLight comes in, as it aims to provide extra facilities to the users than the current system is offering. For future, StarLight has planned to provide real-time solutions for merchants & customers. Integrating the latest blockchain technology advancement is the prime focus of StarLight Ecosystems to provide the best and the most secure payment solution.

Crossborder Payments

StarLight offers one of the speediest cross border payment services. It is built as a payment solution completely dedicated to the members of online economy where all transaction are performed in fiat currencies. The user of StarLight web or mobile wallet is instantly notified by an alert of every new incoming payment and likewise for every withdrawal of fiat currency from the wallet.

P2P Payment Services

Peer-to-peer payment is one of the hottest trends in the payment industry. StarLight offers this facility as well. It is blisteringly fast, free and an extremely simple way to transfer money to another person. There is no third party involved, and using the StarLight coin eliminates the hassle of fiat currency exchange rates.

E-Commerce uses

In the ecommerce biosphere the StarLight coin increases the efficiency of transactions with its low transaction fee and elimination of any middle man. Enhanced security gives both the merchants and the consumers the assurance that their payment is safe from hacking. Decentralized payment gateway helps merchants get accustomed to the platform quickly.

2. Investment & Trading Platform

Although majority of profit comes from StarLight Payment Gateway but being a part of cryptocurrency industry StarLight platform also generates 40% dividend from cryptocurrency trading on a daily to monthly basis.

Majority of investment platform claim that they generate profits from volatility software or trading bot , But as per our research we found that volatility software or bot are suitable for small funds. They are not suitable for large-scale funds. Low liquidity at certain exchanges and highly volatile nature of cryptocurrency makes deriving daily profits from large funds via bots or volatility software unfeasible.

What is StarLight analyst Bot and how does it work ?

With our 3 years of experience in trading and with the assistance from high level developers and professional traders, we at StarLight have created our very own data analyst bot called "StarLight Data Analyst Bot".

Based on the principle of " Volume is the Key " this bot does not make trades on exchanges but analyses hourly , daily ,weekly ,monthly volume data for each cryptocurrency and helps make the decision about which trade is the best to opt for. Not only this, this bot also filters arbitrage opportunity for instant profit using small funds. The data collected by the bot is analysed by professional traders and the profit is generated manually on a daily to monthly basis. those profits will be distributed to the staking users daily. Our tests have shown the StarLight analyst bot to be more efficient than all the competing bots.

What is buy with confidence program

Have a fear of ICO? StarLight team introducing Secured ICO investment program called "BUY WITH CONFIDENCE". In different platforms many ico buyers get affected when coin value down below to ico bought price. thus, we created this program. This Program exclusively available for ICO buyers only.

As we all aware about crypto currency industries types of ICO's are simplest way to get money for projects and new upcoming development or requirements, but as per the market review and surveys up to 90% of ICO's system failure because many of them are run away with investment or they didn't provide right development and services according to project requirement as they promise to investors in roadmap.

Now enough, this scenario or methodology will not happen in future with our StarLight investors. Here, we take care of yours and your investment. We are going to launch fair and very safe ICO's system for our ICO, where you can not lose anything from your investment. We want to build the trust among our StarLight community that we can provide what we promised while invest in our ICO system. StarLight team backed with world class and highly experienced blockchain developers and brilliant crypto advisers. Here, we are providing valuable eco friendly system which exactly investor want. We will provide you refund of your investment amount of ICO's, If StarLight team did not provide you proper guidance and development services as promised.

Lest See With an Example So you get the clear idea :-

For Example As per The Roadmap Company Have Promised That StarLight Coin Will be launch on external Exchange in x Month ,if coin not get listed on External Exchanges in x month. you can Back Starlight Coin To us And We Will Send funds in your wallet what you have invested in ICO.

Sounds Cool ? Let's explain it more, Suppose You Have Bought 1000 Starlight Coin During the ICO at the Rate of 0.20 USD. After end of the ICO , if you want to return all Coin and want to Get back your invested amount then you can send back the Coin to us and Get the BTC or ETH equal to 200 USD. you can do this process in dashboard.

- In the Dashboard there will be a function called " Buy With Confidence " Where you can use this facility.
- This service will be enable after end of the ico for ico buyers only.
- This is Example you can back your coins for any reason and Our Team Will Provide Fund In Your Wallet
- Only Investors Who have bought coins during ICO stage can return Them Coins.
- You can Back Amount of Coins which you have bought in ICO , If You have bought 10,000 Coin During ICO you can Back Max 10,000 Coins to us.
- SLC Which you used for Powered Staking wil not count for back to us.
- Free Airdrop Coins, Bounty Reward Coins also not count for back to us.

We believe this program allow our users to buy StarLightCoin with confidence and Building Strong Support between SLC Buyers and us.

**So Don't Miss out this Great Opportunity
with us. After all its Your Coin, Your Rights :)**

Powered Staking Program

StarLight Powered Staking is a unique Multi-payment Staking and Investing Program compatible with our Business Model. It must be kept in mind that powered staking is a way to provide daily returns from platform through staking investment and this is not based on original concept of coin staking.

Using BitGo Enterprise it becomes easy to provide Multi-payment Platform for your Staking and investment returns. Particularly for StarLight users, they can generate long term and more stable returns with this platform. You can toss away your USD\$ based wallet as we never furnish your daily profits in USD\$. Instead your profits will be reflected as SLC or any cryptocurrency supported by our platform which includes Bitcoin , Ethereum , Bitcoin Cash , Ripple, Litecoin and Bitcoin Gold.

You have to simply choose payment form in which you want your daily profits, i.e. any cryptocurrency. Also, to invest in this platform the user must use SLCs as it keeps the demand of SLC on the rise and makes it valuable (comparable to Binance) using BNB for their platform.

Investor who believes in potential of SLC Coin can choose payout option in SLC and your daily powered staking profits will provided in SLC.

Investor who wants to generate long term fix profits can choose their payout in the Bitcoin.

in Future , We are planning to provide daily payouts in Other Crypto currencies as well.

Example 1:- Payouts in SLC

John invests 1000 SLC in powered staking so he can gain daily profits of up to 1.5% in SLC for 120 Days.

Number of SLC = 1000

Approximate powered staking profit rate of the day = 1%

Therefore, powered staking profit of that day = 15 SLC

That's how John can earn SLC. He can either sell it to internal and external exchange to collect daily profit or he can hold on to it to gain higher profit on SLC gains.

Example 2:-Payouts in Bitcoin

Bob puts 10,000 SLC at a rate of 1\$ powered staking and he chooses payouts in BTC , so he earns up to 1.5 % Daily + 0.10 % daily bonus as shown below :-

1 SLC = 1\$ (the SLC rate when Bob started powered staking)

As stated above, Bob started powered staking with 10,000 SLC = 10,000\$

Approximate powered staking profit rate of x day = (1.5 % + 0.10 %) daily

Powered Staking Profit of a day = 160\$, if BTC rate of x Day = 20,000\$, then BTC payout= $160/20000=0.008$ BTC.

Powered Staking profit of a day = 160\$, if BTC rate of x Days = 10,000\$, then BTC payout= $160/100000 = 0.016$ BTC.

That's how Bob can generate daily fix income by choosing BTC as payout and he doesn't have to worry about the fluctuating BTC Prices.

Powered Staking Plan

Amount	Powered Staking Reward	SLC release After
\$100 - \$1000 SLC	Up to 1.5% Daily	120 Days
\$1001 - \$10,000 SLC	Up to 1.5% Daily + 0.10 % Bonus	90 Days
\$10,001 - \$1,00,000 SLC	Up to 1.5% Daily + 0.20 % Bonus	45 Days
\$1,00,001+ SLC	Up to 1.5% Daily + 0.35 % Bonus	30 Days

What is an initial coin offering (ICO)?

ICOs are similar to IPOs and crowdfunding. Similar to IPOs, a stake of the start-up or business is sold to raise money for the entity's operations throughout an ICO operation.

In this case, we are offering Starlight coins to keen investors.

While IPOs deal with investors, ICOs deal with supporters that are keen to invest in a new job similar to a crowdfunding event.

ICOs are simple to structure due to the fact that of technologies like the ERC20 Token Requirement, which abstracts a lot of the advancement process needed to create a brand-new cryptographic property.

The Goal of ICO.

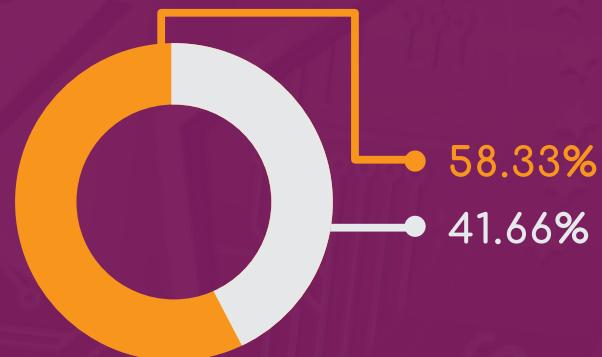

- In the ICO project, fans of the company's effort purchase a few of the distributed crypto coins, in this case, Starlight coins with fiat or virtual currency.
- These coins are referred to as tokens and resemble shares of a business sold to financiers in a Going public (IPO) transaction.
- When the fund's requirements will be fulfilled within the stipulated time frame, the money raised will be utilized to either initialize a new plan or to complete it.

This enables you to a 10% referral bonus on each successful referral. This is a great opportunity to earn more on your invested money.

All referral commission will be Paid in SLC Coins .

ICO Referral Bonus

Powered Staking Affiliate

This is Great news for all our active promoters. We Offer 10% Fixed Reward gives in SLC When a person you invited Starts Powered Staking.

Fixed Reward

StarLightCoin Mining Algorithm

Starlight coin is mined using the X11 scrypt algorithm. Put simply X11 uses 11 different types of hashes to mine the coins.

Since it consumes a considerably less amount of electricity, X11 is cost-effective and energy-efficient.

X11's hash rate is measured by MH/s: Megahashes per second, or one million hash computations per second.

It also keeps Graphics Processing Units over 30% cooler making those expensive graphic cards less prone to overheating since the Graphic cards don't require as much processing power in order to mine the coins with X11 algorithm.

With clear roadmap and essential planning, we plan to kickstart Starlight coin cryptocurrency offering in the market.

With ample amount of space to grow, the cryptocurrency market is the beginning of a new eco-system and with Starlight coin we have planted the seeds of staggering growth.

Thank You!!!
