

BITNXT

THE FUTURE CRYPTOCURRENCY

WHITEPAPER
2017

WELCOME

Today we will show you something that is going to change the world for years to come. We invite you to join the growing cryptocurrency revolution with us.

Q: What Is the agenda?

A: Blockchain and cryptocurrency awareness.
Introduction to cryptocurrency.

Technology has evolved the world

1. Tesla changed cars.
2. Google changed the vision of knowledge and information.
3. Media saw a change with the incorporation of social media like Facebook and Twitter.
4. Communication was changed by smartphones taking over conventional phones.
5. Now it's the era of a further more significant economical change. That is cryptocurrency.

Everything has turned digital

1. Today every thing has turned digital. Shopping, booking, films and now even money.
2. We are at the transformational curve of a change in the human psyche from conventional money to cryptocurrency.
3. Cryptocurrency is not just money but a digital asset like gold.

Change in money

Money now is not calculated by the gold reserve a country has. Money now is in the form of digital numbers in accounts. This is where banks charge money for transactions of per say a digital currency.

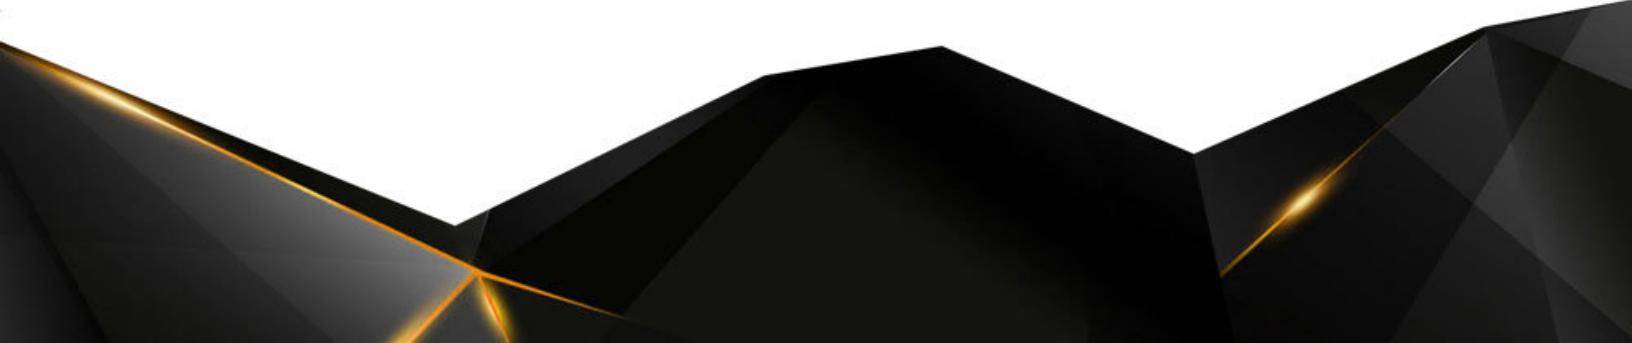

So money has already changed from a physical aspect to a digital format since a very long time.

Flawed FIATcurrency system

1. Worldwide debit is increasing inflation in the world to concerning levels.
2. Every person in the world is pressed under the weight of credit expansion.
3. Centralized banks only believe in making profits.
4. Manipulation of numbers in the gross domestic product is evident.

Money needs reinventing

1. Blockchain and cryptocurrencies create great possibilities for replacement of conventional money in the future.
2. Digital currency offers secure, transparent and accessible options in money transactions.
3. Assets have become digital. Replicating and even exceeding the value of gold.

Blockchain is the future

The blockchain is a digital online ledger for keeping track of the transactions made online through cryptocurrency.

As cryptocurrency is decentralized and has no regulatory body to control the transaction the blockchain keeps the ledger encrypted for security and transparency.

A blockchain is basically an encrypted code which keeps your transactions secure by keeping the data information in different blocks in the blockchain and miners have to find the code of the blocks to crack them and receiving the token as rewards. Bitnxt coin does not have a central regulatory authority and hence does not have any body to dictate when to create more currency.

Blockchain will run the most complex algorithms and keep the transactions safe and transparent.

Blockchain will be incorporated in all the major sectors by the end of this decade.

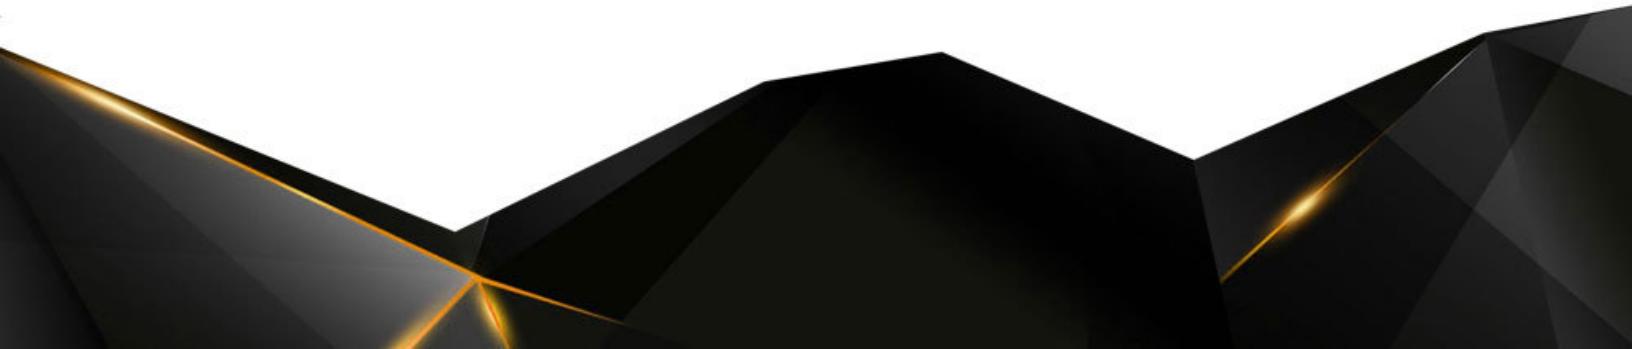

It provides you the ease of access from anywhere on the globe.

Our payment methods

1. There has been a paradigm shift in the use of conventional money. Today we already have started using way more plastic or digital currency.
2. Smartphone's and the internet technology has changed the way we make transactions.
3. Digital currency is already a part of our daily lives.

Blockchain will become the system

1. 80% of all the corporate industries in the world are developing their own blockchains.
2. Countries are trying to shift all their major functions on the blockchain technology.
3. Governments around the world see cryptocurrency and blockchain as a viable substitute for conventional currency.

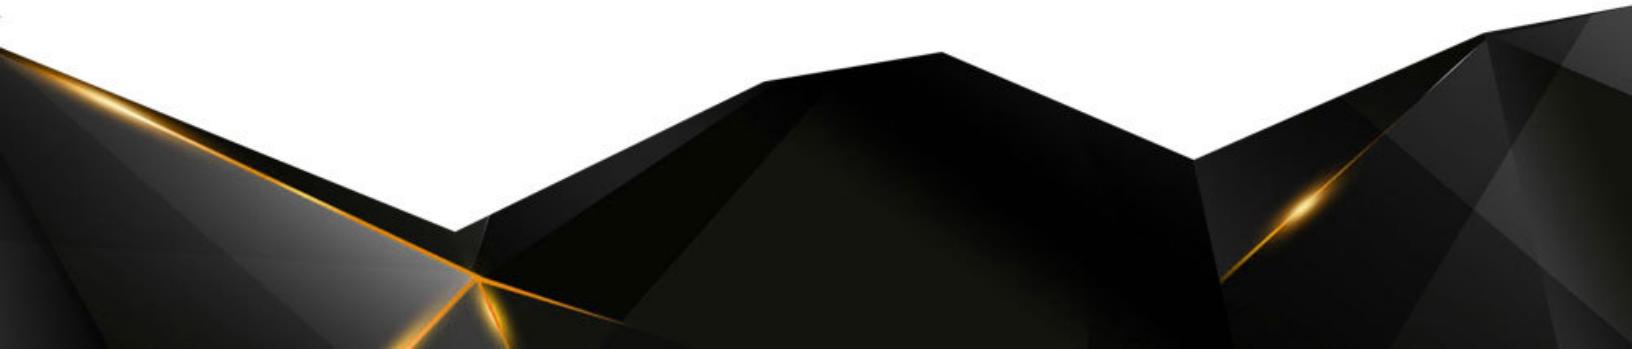

Bitcoin brought the change

1. The first cryptocurrency that is bitcoin was created on the basis of blockchain.
2. Bitcoin is still the most trusted cryptocurrency.
3. It is decentralized that makes it of the people for the people and by the people.
4. Bitcoin is accessible from anywhere in the world with minimal transaction fees.

Growth of Bitcoin

Bitcoin has seen an exponential growth since its incorporation in 2009. Where it started at \$1 in 2009 it has now reached 4000\$ in 2017.

Investment moghuls

Early investors and believers in Bitcoin have become rich millionaires now.

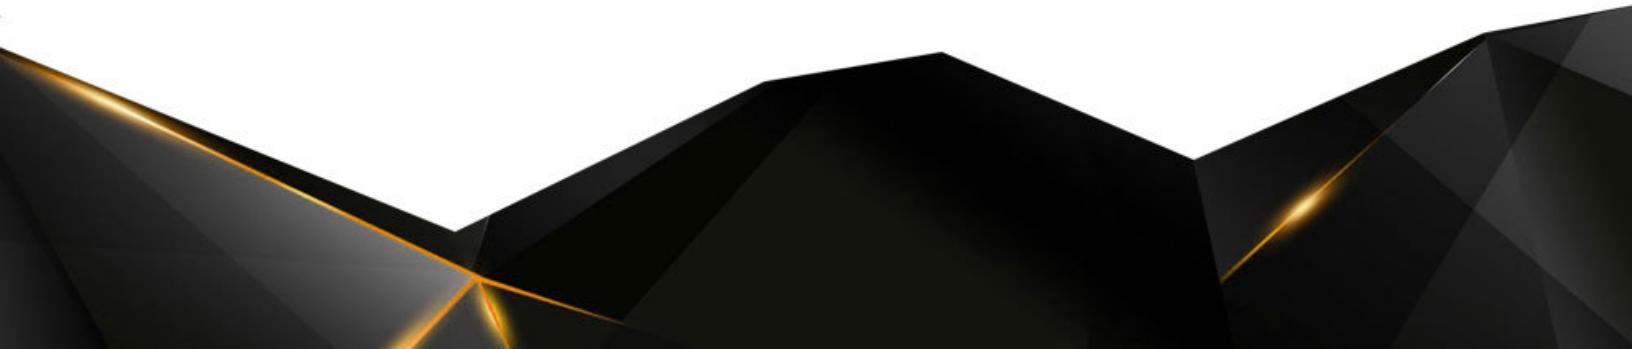

There have been people like the winklevosses, Jared kenna, charlie sherm etc who have become moghuls in the cryptocurrency world. Cause they had the early investment vision and invested in bitcoin at its incorporation into the system.

Growth

As per a study and statistics it is suggested that the price of bitcoins and cryptocurrencies is only going one way and that up.

This digital revolution is going to grow.

Cryptocurrencies are just in their infant stage right now and have immense growth potential in the years to come.

Drawbacks of Bitcoin

1. Delayed transaction confirmations.
2. Low global acceptance.
3. Being Anonymous makes it vulnerable for use of illegitimate practices.
4. Most governments are against the notion of cryptocurrency.
5. No regulations and proper governance.

Innovation vs. skepticism

1. Nokia became obsolete and gave way to Samsung and Apple.
2. Shopping gave way to online shopping.
3. In the same way cryptocurrency is the future of money and will soon take over the reigns from conventional money and will solve all the problems with money and in itself.

What next ?

1. All the major corporate companies and governments understand the underlying benefits of cryptocurrency and are preparing for a complete change over to cryptocurrencies.
2. In the near future Cryptocurrencies will replace conventional FIAT currencies.

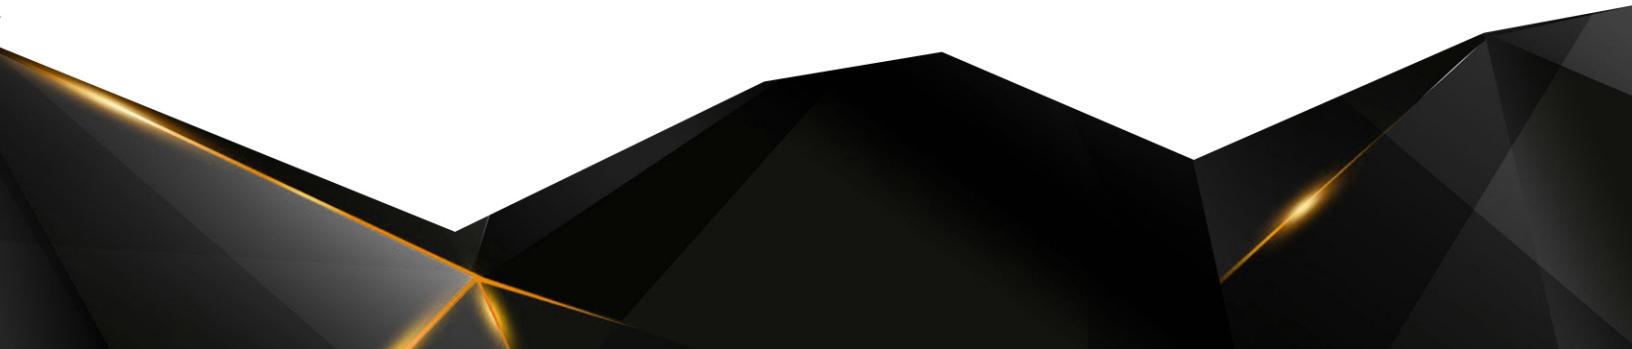

THE BITNXT NEXT GENERATION PRESENTATION

The blockchain evolution

1. The block chain tech is the future and it is being accepted worldwide as a viable replacement for FIAT currencies. The blockchain supports and powers the now multi million dollar cryptocurrency market.
2. Cryptocurrencies and blockchain are in an infant stage right now and will grow to become reigning power in the coming future. Being Transparent , secure and user friendly.

The Bitnxt team

We are here to bring a positive change in the way the market and money functions. Through bringing in revolutionary technology to the world like the blockchain and cryptocurrency to work hand in hand with the conventional ways and make the work structure seamless, structured, secure and transparent.

Bitnxt Roadmap

2017 Q1

- Birth of Idea.
- Assemble a Team of Software Developers to develop the mining software.
- Assemble a Team for handling operations & Partnership ventures.

2017 Q2

- Implementing the Idea for online shopping software
- R&D on problems related to the Software and blockchain
- Development of Blockchain to build a stable Platform
- Legal formalities completion

2017 Q3

- Planning Events & Seminars for awareness about the coin technology
- Whitepaper specifications
- Investor meets introducing the online shopping software

2017 Q4

- Launch of Token Sale through ICO
- Testing
- Arranging Events in different countries for Crypto Enthusiasts

2018 Q1

- Coin Distribution through ICO
- Listing of Bitnxt Coin on different Exchanges

2018 Q2

- Promoting in different countries
- Release of Alpha version and wallet

2018 Q4

- Occupying Majority Markets
- Providing fully Integrated services to customers.

2019 Bitnxt Vision

- Worldwide Expansion
- Improving blockchain to handle remittance
- Developing a transformational tech that will orchestrate the evolution of cryptocurrencies.

Global Vision

Bitnxtcoin will keep making positive strides in making more technological advancements.

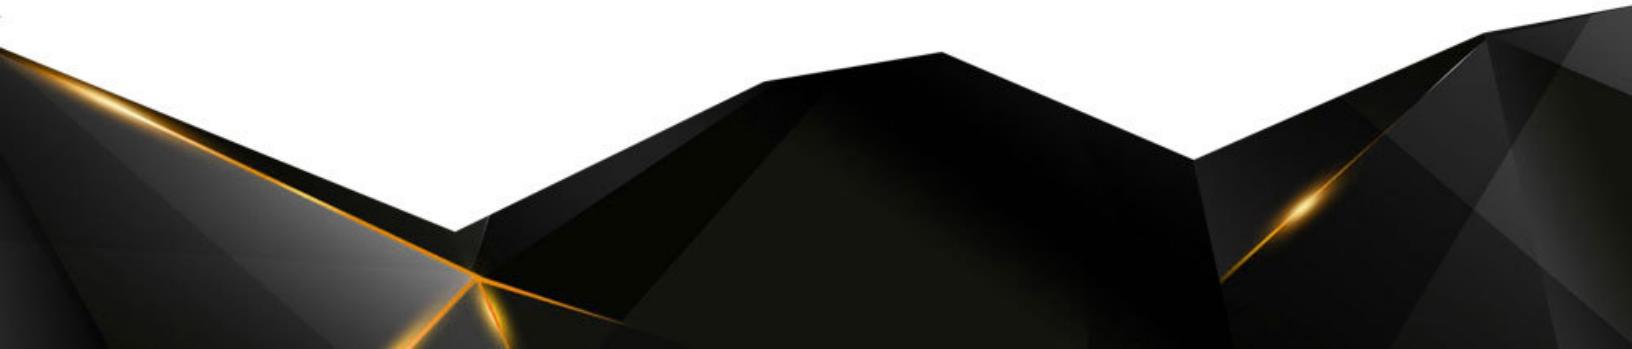

Creating the Bitnxt web

Bitnxt is a global platform for cryptocurrency to have a safe and secure work structure.

Bitnxt will provide you blockchain, smart contracts, crowd funding and crypto services around the globe. Our authentic network will make sure that your funds are protected in a safe environment with you in complete control of your money rather than a bank or legal organisation.

The Bitnxt digital asset management

Bitnxt provides the best digital asset management system in the crypto market. Making your digital currency an asset over time like gold.

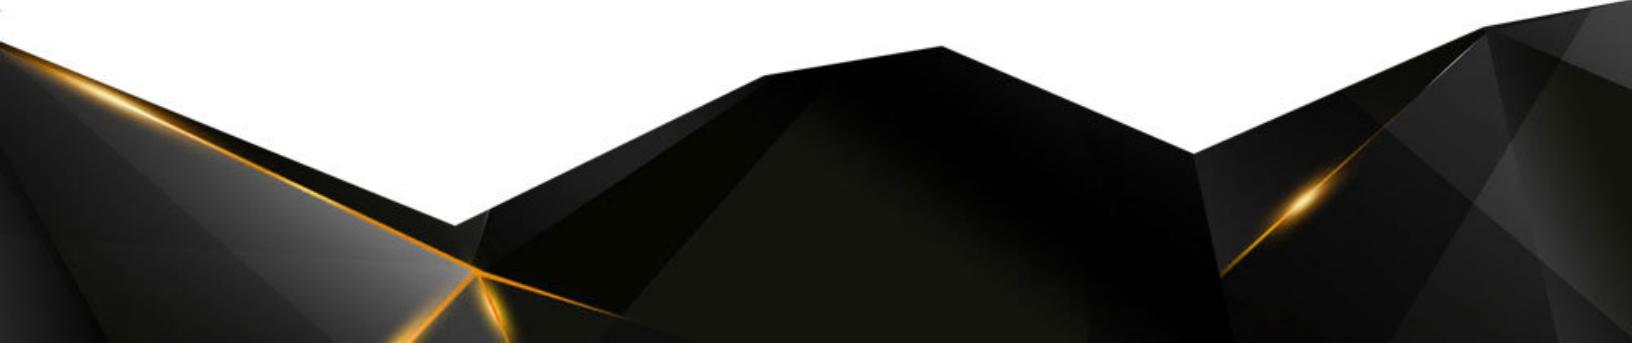

**BITNXT THE CURRENCY
OF THE FUTURE
BROUGHT TODAY**

The digital currency

A coin that combines all the aspect of decentralized banking and transactions with a number of other benefits.

1. Legit network
2. Utility
3. Greater performance, efficiency and security.
4. Better Performance
5. Robust Ecosystem
6. Authenticated Network
7. Broader Adaptation
8. Enhanced Security.

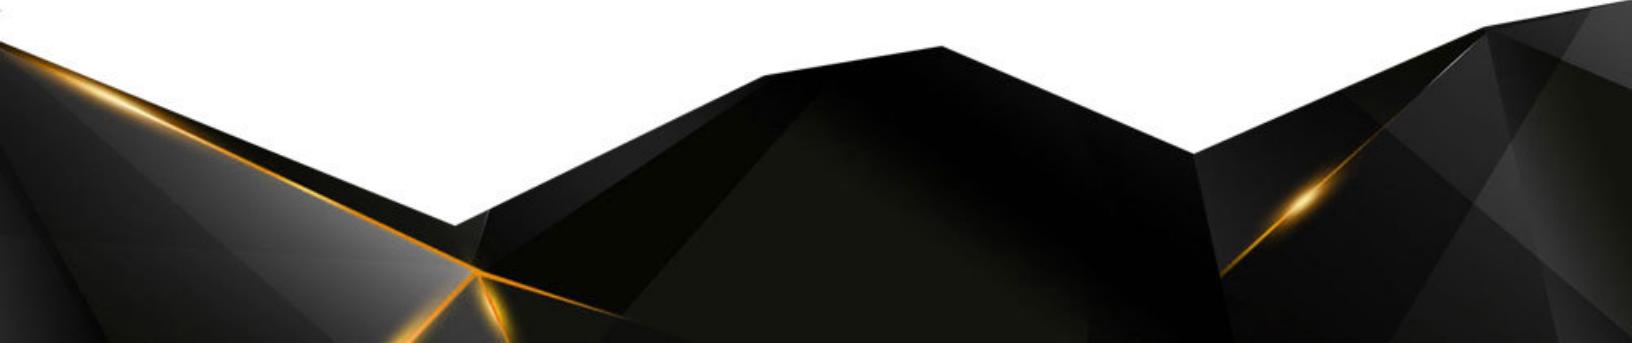

Designed for Success

1. Fast- Payments take less than 7 seconds, it uses one of the fastest Blockchain mechanism.
2. Millions of people will use our Bitnxt.
The world most secure digital currency with a hardware wallet required on every transaction.
3. Every user is verified by a certain authenticating process & every transaction is secured.

Bitnxt process

(Change das coin content to Bitnxt)

Bitnxt wallet

1. One of the most advanced mobile wallet payment systems ever developed.
2. World wide acceptance by merchants.
3. Average transaction time 10 seconds.
4. Bitnxt wallet is the cornerstone of the Bitnxt coins success.

Bitnxt elevate

1. The elevate algorithm is a upgrade hash that double cycle the mining process to secure and ease of the block at the same time.
2. The elevate process will be repeated every 100 days to keep the Bitnxt system up to date.

Built for security

1. An authenticated network is a foundation of secure operation through the world.
2. Every holder of Bitnxt Coin is fully authenticated using a standardize banking process.
3. A validator, it is a device which is used by every user to transfer coin

Become a Customer

1. Authentication- As a part of Bitnxt coin process, your name and address to validate your identify
2. Authorization- You will receive a key that is unique for every user and will that you will be able to access the Bitnxt Coin
3. Capacity- It will occur in cycles, shown as unit of network capacity on Bitnxt

Frequency Ensures

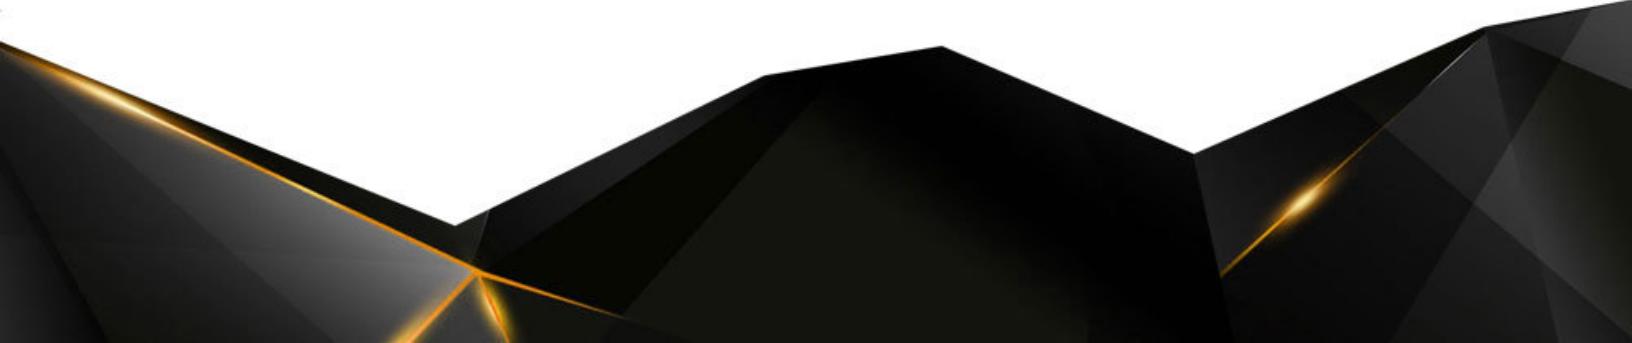

1. As the network expands, the number of cycles it takes to mint a Bitnxt coin also increases. This ratio is called as Frequency □
2. What does it mean to you?

Build Something Amazing

1. Blockchain is the most significant technology and one huge leap into the future
2. Digital currency empowers people through the globe.
3. Early participation unlocks different opportunity for every coin holder.

Fantastic Income

1. Amazing compensation plan
2. A potential to earn unlimited coins
3. World-class training and support
4. A chance to earn rewards and get recognition

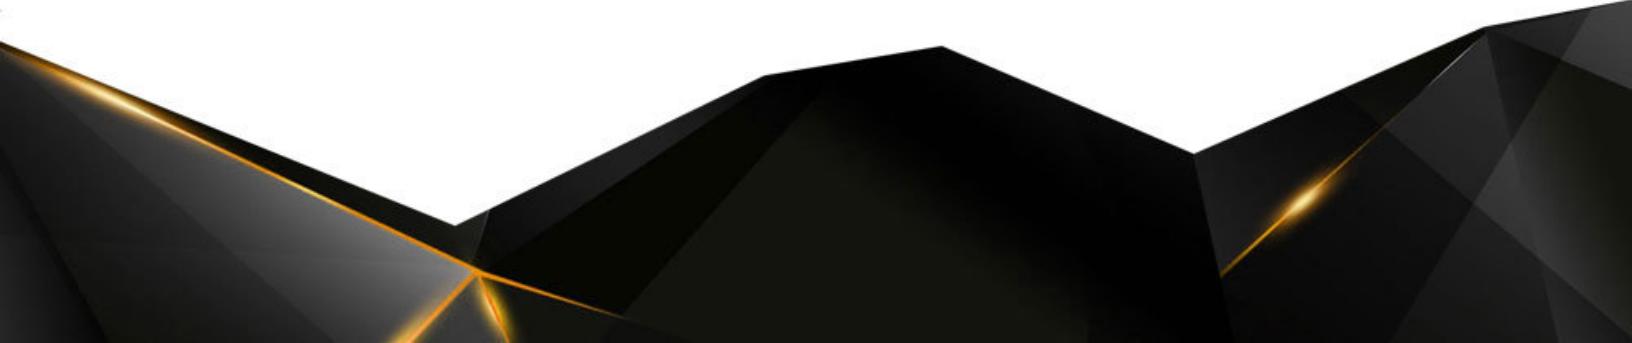

Easy to Do

1. Does not require any experience
2. A good way to earn apart from you're your job or business
3. Can also be done as full time
4. Can easily work from home

Choose BITnxt

Be the first to join the Bitnxt network and take the your first steps into a brighter future

Bitnxt

The Bitnxt coin venture started in the last quarter of 2016. In 2017 Bitnxt coin is changing the perception about cryptocurrency. Bitnxt coin technology is used to create a globally accepted cryptocurrency market. With this unique tech and a powerful blockchain, technology Bitnxt coin will provide a global platform for trade.

Vision

Bitnxt coin aims to create an environment that has an acceptance for cryptocurrency as conventional or FIAT currency. Various sectors of business and world management can benefit with Bitnxt. We also have created a Bitnxt network that provides the customers freedom to mine Bitnxt freely.

Mission

Bitnxt coin makes cryptocurrencies to customers globally. Our customers are not hesitant and understand the capability of digital currency. We create awareness and acceptability for all cryptocurrencies through the Bitnxt community. Further our evolutionary technology will provide a safe, fast and transparent platform for trading across the globe.

What is Bitnxt coin?

1. Bitnxt coin is merely a digital asset that will be used alternatively like conventional or FIAT currency. Bitnxt is decentralized and the regulations that entail a traditional bank are not applicable to your Bitnxt account.
2. Bitnxt coin has no centralized governing body. Your Bitnxt coin account can never be frozen or shut down by any federal agency in the world.

Features of Bitnxt Coin

Remittance

remittance is the fund sent to countries of their origin via wire transfer or online transfer. These peer to peer transfer like a social network to transact funds globally. The significance of remittance is economically significant for many countries that receive them. Bitnxt coin creates a safe and transparent environment for these types of major transfers which have the capability to affect financial markets.

Universal currency

This is one feature that Bitnxt coin offers to its customers. Universal cash is a feature that provides the customer the freedom to use Bitnxt coin as a conventional FIAT currency like the dollar or pound globally with the exact same accessibility and acceptance.

Transparency

Bitnxt coin is a clear transaction method. The system incorporated in Bitnxt coin is the strong blockchain which is a peer to peer network. Where all the transactions can validated instantly. The transactions made by others also can be viewed on the public forum creating a transparent network.

Accessibility

The decentralized blockchain and cryptocurrency makes your funds accessible universally, no federal agency or government can freeze or shut your account.

Proof of work

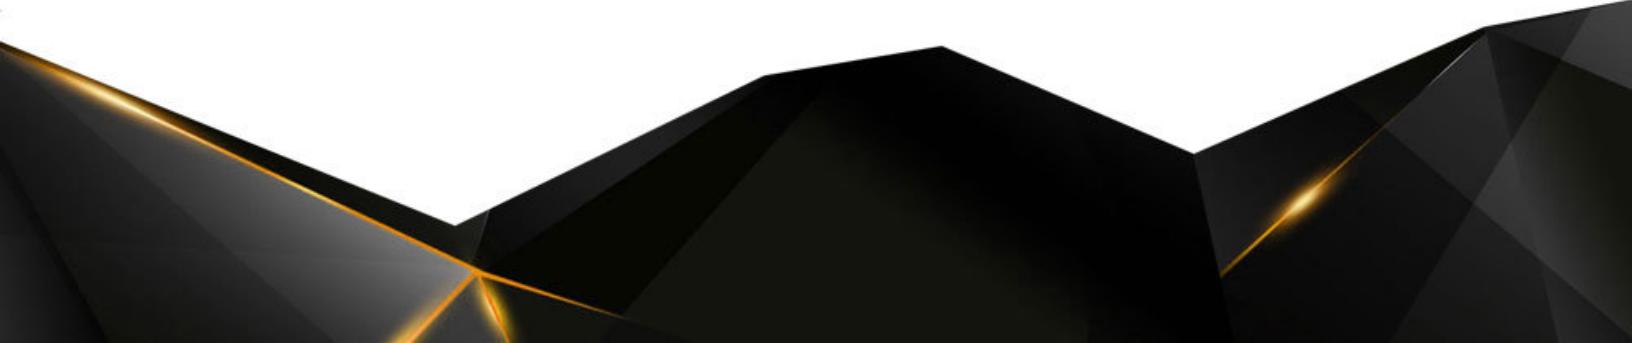

Is a digital algorithm which verifies the requirements after verification. We at Bitnxt coin have developed a state of the art Hash algorithm with the scrypt technology for this process.

Team

Our dedicated team is always present to give you a heads up for a brighter future.

Join bitnxt in creating history

1. We are at the cross roads of a great planetary shift in the way we make transactions and the way we perceive money as a whole.
2. We are about to enter a future with the power of cryptocurrency and the world changing technology of the blockchain.

Time to decide and choose
a side for a brighter future
