I. Project Background

Introduction of 5iquant

5iquant is a technology–driven Internet financial service platform, with the core of intelligent quantitative trading. Since its establishment in February 2015, the project team started to expand the member around the world. In April 2016, the project received angel investment of 6 million RMB from renowned venture capital fund. Till now, the core team consists of elites from all around world and world–wide agents’ amount has surpassed 5,000.

As a world top–class quantitative platform in global financial assets trading field, 5iquant takes intelligent quantitative trading as its core and mobile internet and artificial intelligence technology as the base, devoting itself as a provider of simple, efficient and one–stop service platform which integrated smart financing with social contact for vast ordinary investors as well as professional traders. It desires to get through the pass way between trading and intelligent investment consultancy thus to complete the comprehensive layout on basis of mobile internet, big data and artificial intelligence module, with the core of mobile trading service and intelligent investment consultancy. Currently the platform can realize automatic trading of financial assets including global stocks, futures, share option and foreign exchange for accumulatively over 230,000 professional traders and provide 73,000 trading strategies.

5iquant keeps looking for the new opportunities in market brought by block chain trading and our technical team has never stopped exploring and researching the application of block chain technology in actual financial and digital assets trading filed. In recent years, along with the trend of globalization and rapid growth of cryptocurrency , our unremitting efforts and technical innovation have finally granted us important breakthrough in this research area.

Our Mission and Vision

5iquant is currently the only successfully landed project in which world top-class quantitative platform applied in block chain fields. Meanwhile it is the first to realize one-stop intelligent automatic trading of global actual financial assets and digital currency by integrating block chain and smart contract technology with innovated application of artificial intelligence. Iquant chain will be used to establish a decentralized, safe, convenient, intelligent and globalized quantitative trading platform which seamlessly connects global digital assets with actual financial business. For example, the actual financial assets represented by stocks, futures, share option and foreign exchange and the global digital currency represented by BTC and ETH will be put together, the first time in the world, for trading on one integrated platform by Iquant chain. 5iquant will provide comprehensive, intelligent, simplified and one-stop quantitative automatic trading service for ordinary investors as well as professional investors around the world, thus jointly promoting new financial development for global block chain.

One-stop Integration of Global Digital Assets with Intelligent and Quantitative Financial Investment

Currently, the world's major digital currency exchanges and actual financial assets exchanges do not take in each other's transaction objects, especially when block chain investment market is still at its early stage. Moreover, most of the block chain assets distribute on different trading platforms among different countries, so ordinary investors often encounter with various problems like UI not unified, transaction unstable or words monolingual which forced them to switch their investment via several exchanges. Therefore, transaction on this integrated platform upon Iquant chain will help users realize intelligent push-button investment of global digital currency and actual financial assets safely, promptly and stably.

II. Demonstration of 5iquant Platform

Leading Global Quantitative Trading

5iquant has already realized intelligent automatic trading of global financial assets including stocks, futures, share option, foreign exchange and so on. At present, we have accumulatively more than 230,000 professional traders and over 73,000 smart strategies on the platform.

One-stop Investment of Global Financial Assets

5iquant allows transaction of any object in major financial assets exchanges around the world including stocks, futures, share option and foreign exchange, in addition, this integrated platform provides investors with the push-button function to make intelligent investment with trusteeship to the Cloud (7*24 automatically operating).

◀ 第一页 1/14 页 后一页 ▶

III. Technical Features of Iquant Chain

Introduction of 5iquant

Iquant chain will create the first application of block chain technology in connecting digital assets with actual financial business in this industry.

Underlying architecture of Iquant chain includes Ledger layer, service layer and application layer

1. The implementation of Smart Contract will demonstrate the principle of trust. The Iquant Chain platform, as the intermediate carrier, will automatically execute the transaction according to certain time requirements and programmed circumstances, The multi-parties involved do not have to trust each other, therefore the trust issue in traditional financial scenario can be solved.

2. Placing orders on Iquant chain platform, similar to that on traditional financial trading platform, will be rather convenient, prompt and easy. The returns users get will depend on their own strategies whereas the platform, in principle of zero-sum, will never influence user experience or interfere with the transaction. The underlying architecture of Iquant chain has the similar advantage with that of graphene, the high concurrency of handling capacity.

3. Modularized development of technical architecture makes the Iquant chain platform highly expandable, so the future performance enhancement will be easier to achieve including the transaction volume increase, encryption of transaction and change of the consensus algorithm.

4. Anchoring the traditional assets, the smart contract will also operate bulls and bears, subscription and big amount trading, etc.

5. Different from traditional exchanges, users' orders will be sent from the address on Iquant chain platform instead of from the traditional exchange account which was bound with personal information so that users privacy could be safeguarded to certain extent.

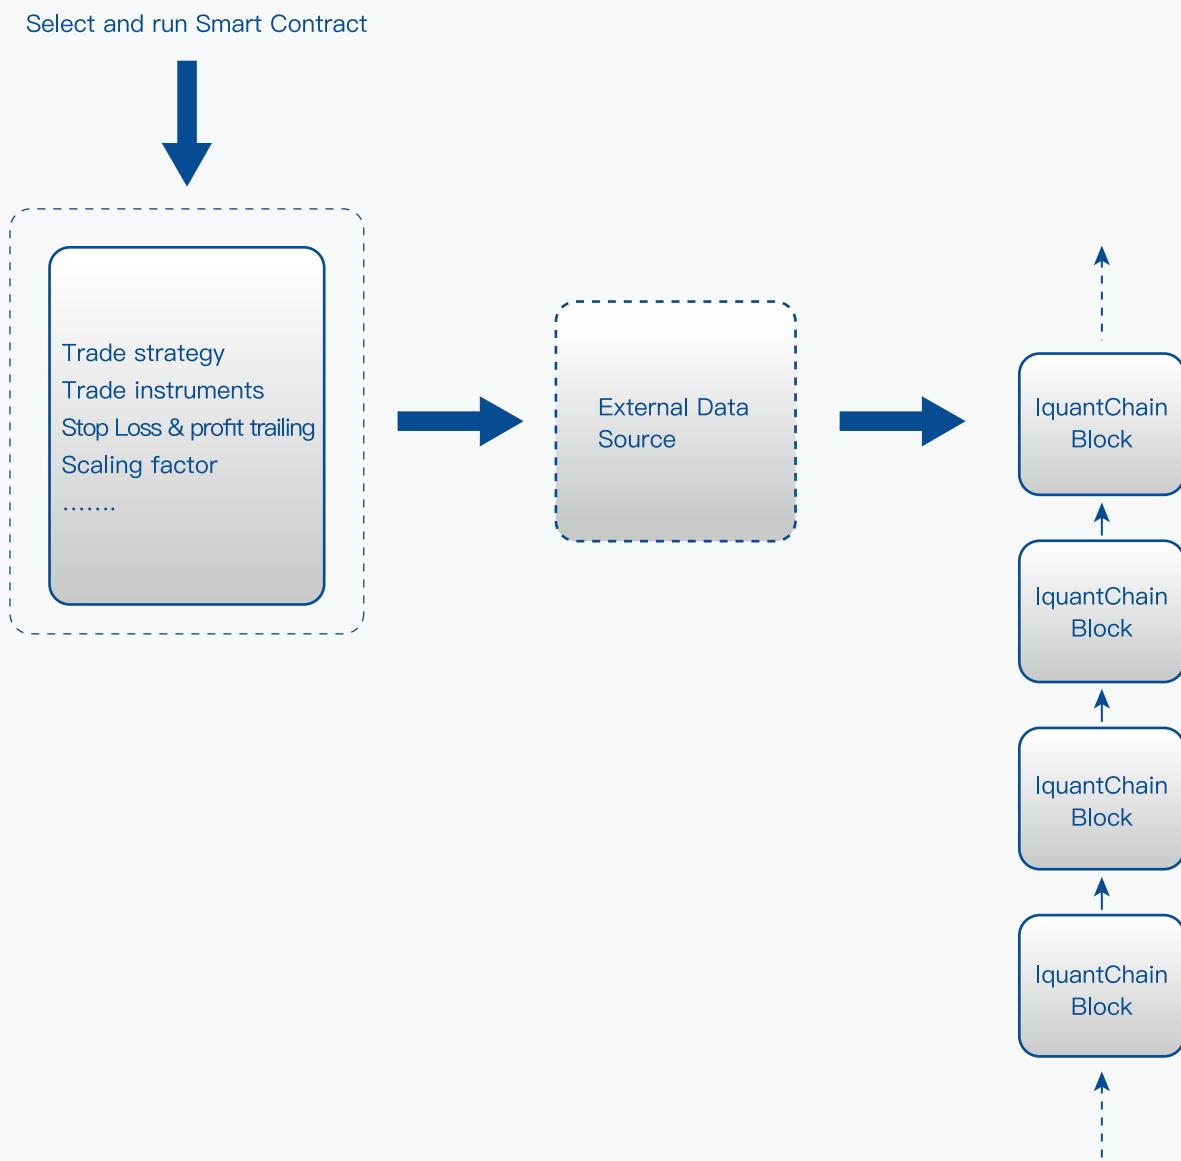

6. Iquant chain source code will published on GitHub, and developers or community members can check the source code and modify or improve it.

Underlying Architecture of Iquant Chain

1. Ledger Layer – Smart Contract

(1) Smart Contract on Iquant Chain

The following picture demonstrates the smart contract on Iquant chain. Investors can set the trade follow conditions such as trading strategy, trade instruments stop loss target, profit trailing target, and scaling factor, and the smart contract will record, implement and protect them from being tampered. Upon usage of block chain technology, the whole process will run safely, stably and promptly.

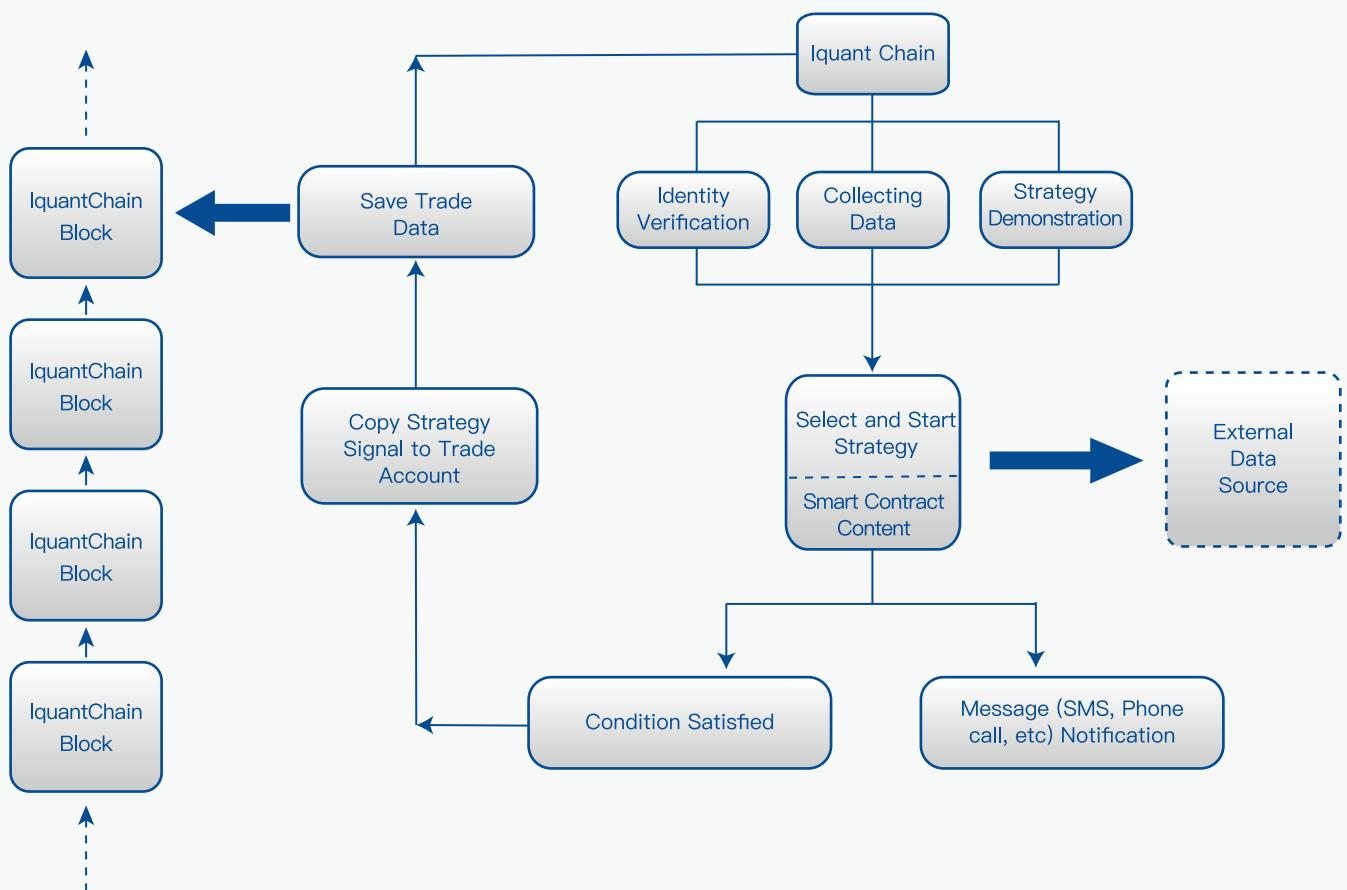

(2) Functionality of Smart Contract on Iquant Chain

A. Decentralized Strategic Trading

When one investor initiates the push-button function to follow professional traders' strategy, the smart contract will match the set options with real-time data thus ensure the automatic transaction to be operated correctly.

As presented here below, the investor has to register his/her own information and choose the platform and strategy, then set the relevant conditions and start push-button automatic transaction. As a result, the smart contract will monitor and execute according to the rules set by the investor.

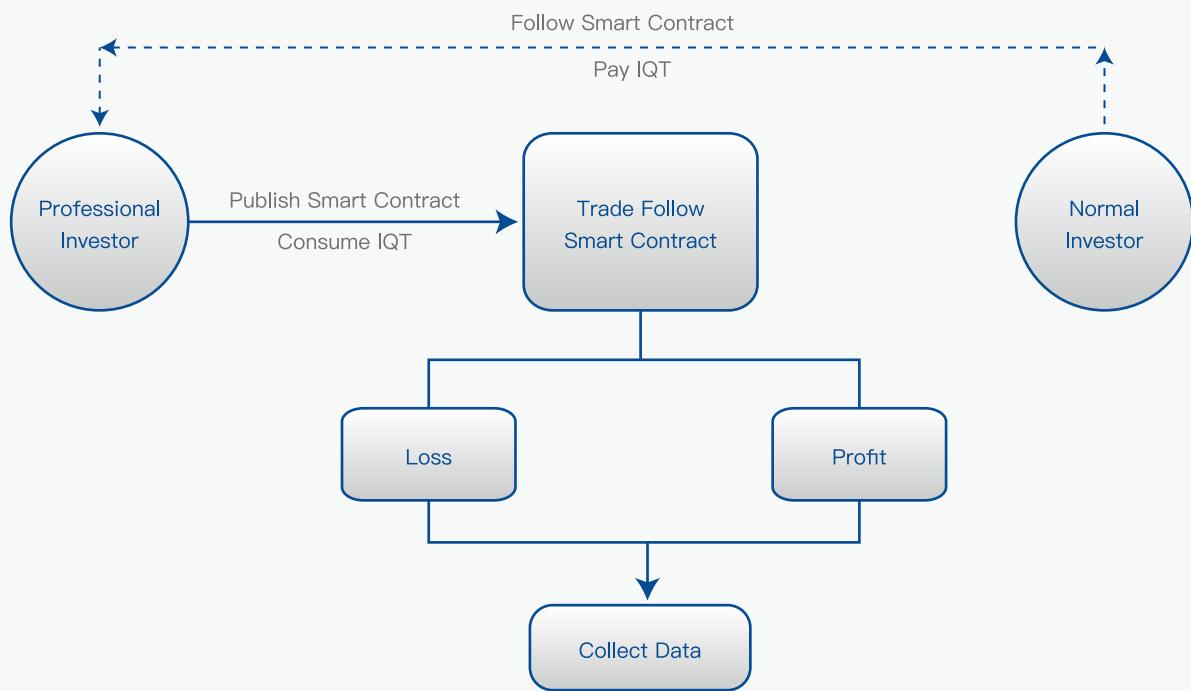

B. Decentralized Automatic Transaction

Through Iquant chain, professional traders can upload their trading strategies on smart contract, and investors can automatically follow these transactions.

All the followed orders will be open and transparent on Iquant chain. Investors have to pay IQT in advance as energy in order to follow professional traders' strategies, and the releasers also consume their IQT to upload these strate

gies. Meanwhile, all the strategic transactions will be recorded by the smart contract, which will be the real-time data base for multi-dimension analysis to generate a rating system for the strategies and professional traders. If its rating meets the prescribed minimum of rating, the strategy will be automatically removed off the shelf. In this way, the credibility of the platform will be promoted enormously and the possibility of fraud on novice investors be minimized.

As the picture has shown, when a professional trader releases quantitative strategy about a particular market by consuming his/her IQT, the investor who wants to follow the order also has to pay a certain amount of IQT first. If the strategic transaction sends the signal, smart contract will collect API from the investor's platform and automatically copy that transaction to his/her account.

2. Service Layer – Customer Service

Service layer is targeting ordinary investors, professional traders, institutions and corporate users, with a variety of auxiliary tools and interfaces, it ensures high-quality service to be easily provided to the customers.

3. Application Layer – Abundant Applications

Application layer mainly develops programmable distributed application to provide abundant applications for end-users on basis of distributed account books.

IV. Token

Iquant Chain uses IQT as the cryptocurrency on the platform.

Iquant chain is the technical foundation of the platform, and IQT, as its token, will be automatically charged as long as affordable when the user has to pay for the services.

Iquant chain platform will charge for the services including but not limited to:

A. Membership

B. Strategy Follow Trade Service

C. Strategy Publish Service for the Developer

D. Cryptocurrency Trade Service

E. Blockchain Assets Management Service

F. Rewards for Strategies

G. Rewards for Community

Besides, Iquant chain will keep working on expanding the usage scenarios so as to better maintain and add the value of IQT.

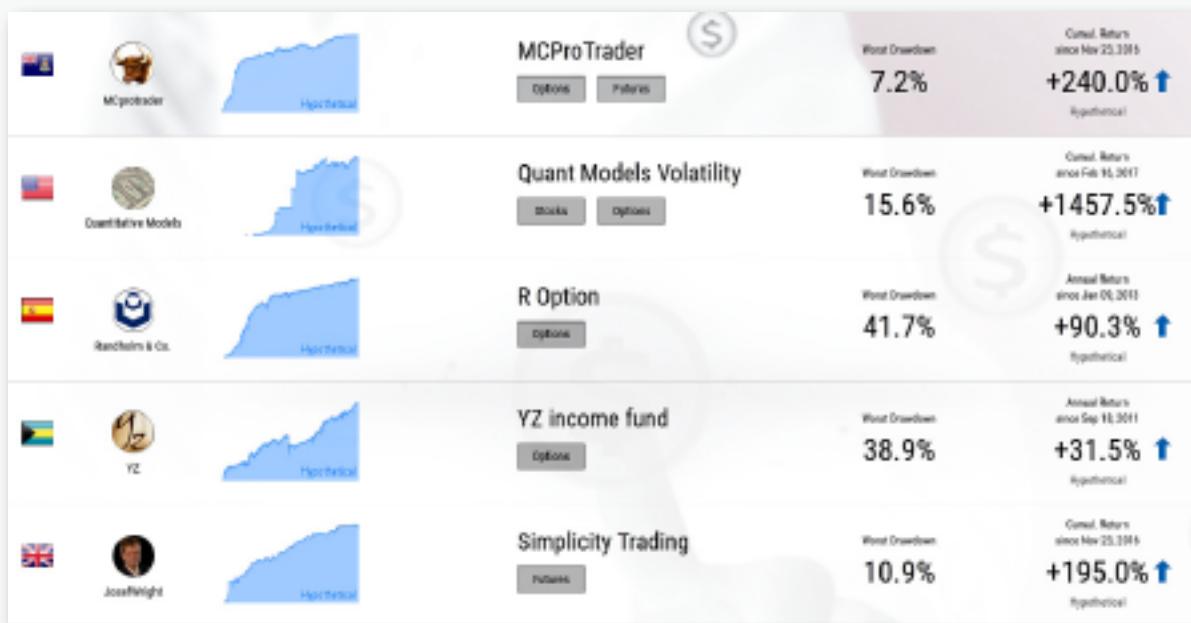

V. Intelligent Trading Scenario under Development

Based on block chain technology, Iquant chain enables novice investors to experience actual trade guidance for free and make automatic trading by following trade leader; enables ordinary investors to place orders automatically via trusteeship to cloud without keeping an eye overnight; enables experienced investors to publish their own smart strategies for novice investors to follow thus making profits together.

Demonstration and Application of the digital assets trading system in developing include but not limited to following scenarios:

One-stop Trading of Global Digital Assets and Financial Assets

Currently, the world's major digital currency exchanges and traditional financial assets exchanges do not take in each other's trade instruments, especially when block chain investment market is still at its early stage. Moreover, most of the block chain assets distribute on different trading platforms among different countries, so ordinary investors often encounter with various problems like UI not unified, transaction unstable or words monolingual which forced them to switch their investment via several exchanges. Therefore, transaction on this integrated platform upon Iquant chain can help users realize intelligent push-button investment of global cryptocurrency and traditional financial assets safely, promptly and stably.

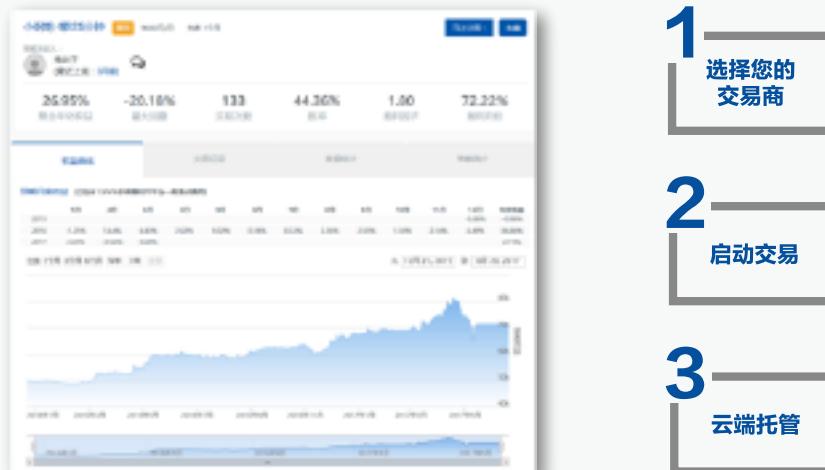

Scenario A. Novice Investors Register for Free and Get Guidance via Demo Account

Novice Investors can experience the guidance of strategic operations for free to learn about the investment process, thus to avoid unnecessary loss. Iquant chain will provide mass guidance experience, when the strategy sends trading signal, you can receive the timely guidance notification by means of social tools (such as Twitter, Telegram, WeChat), SMS or phone call.

Scenario B. Trusteeship to Could Realizing Automatic Transaction

Block chain technology enables Iquant chain to realize trusteeship to Could, so the system can conduct 7*24 automatic trading and liberate you to better life. Office workers, not professional traders, don't have to suffer the loss because of missing important market information so that they can work at rest. Our intelligent digital currency investment consultancy system will make automatic transaction since you initiate the function, and you have no more the need to keep an eye on it.

Scenario C. Independent Risk Parameter Making Risks Controllable

Investor can set their own intelligent parameter of stop-profit point, loss limit, position management and other factors for the strategies they choose to follow, and the system will help them to purchase on the dips or to sell on the top on the cloud.

- 1**
选择一个交易领袖
- 2**
设置风险系数
- 3**
尽在您的掌控之中

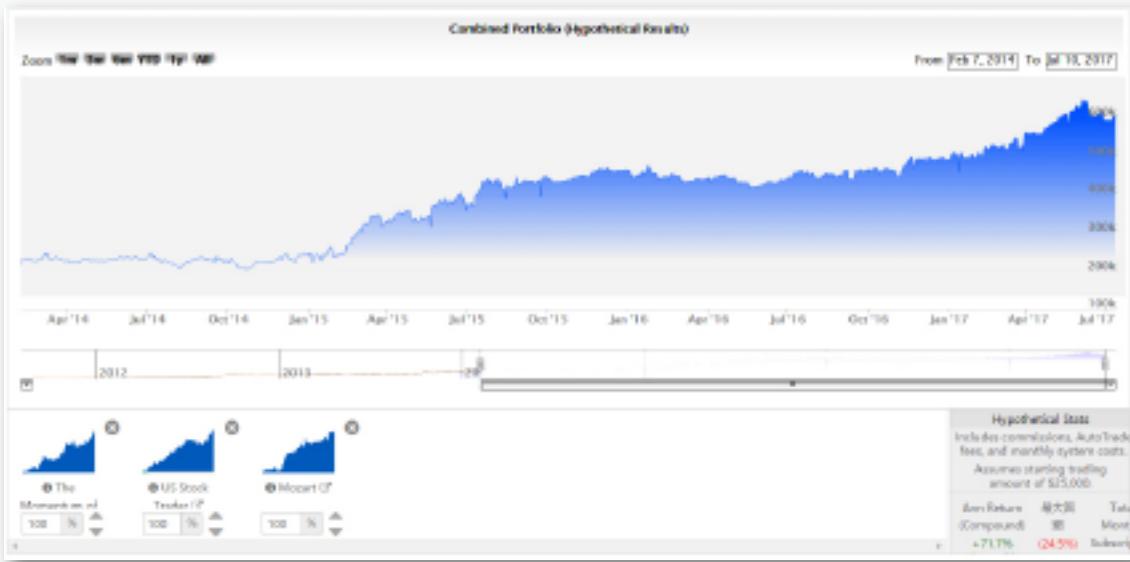

Scenario D. Intelligent Investment Consultancy System Accessible to Ordinary Investors

Iquant chain provides mass strategies of digital currency trading for investors to choose, and the user-friendly interface uses icons to show the history performance. Ordinary investors can follow the smart strategies released by professional traders and make automatic transactions, truly making profits without lifting a hand.

Scenario E. Hedging by Investment Strategy Portfolio

Iquant chain intelligent consultancy system provides strategies portfolio function for investors. Choosing several strategies to make combination, you will see the revenue curve after hedging demonstrated at the system. This one-stop trading platform makes the trading of large value into multiple markets much easier and users no more worry about extensive transaction.

Scenario F. Big Data Analysis Ranking the Trading Strategies

Iquant chain harnesses big data on the website and adopts the analytical model of ratings. By collecting the mass real-time strategies data, hundreds of block chain assets market data and social data, the system will intelligently make real-time ranking of recommended strategies for investors to grasp the profit opportunities.

Scenario G. One-stop Quantitative Service for Professional Investors and Institutions

Iquant chain develops independent back-test module of strategy compiling for professional investors and institutions to help them increase returns with quantitative tools.

BECOME A TRADE LEADER

Six different ways to submit your buy and sell signals.

01. WEB-BASED ORDER ENTRY If you've used an online broker, you already know how to use Collective2. You will manage a virtual "Model Account" on C2, just as you would at an online broker. Your followers will have your trades copied automatically into their real-world accounts.	02. USE REAL-LIFE BROKER ACCOUNT Tell us your real-life broker account number, and we'll copy your trades automatically into subscribers' accounts. No software to run on your computer. Just trade in your own brokerage account as you normally do, and we'll be responsible for the rest.
03. ADVANCED TRADE-ENTRY API If you are a programmer, you can use our REST API to send your buy and sell signals directly from your own software.	04. SEETU STRATEGY LANGUAGE Use Seetu, our new cloud-based backtesting and trading-system development language. No software to run on your computer. Everything is on our servers. Backtest your strategies over historical data, then run them in go-forward mode.
05. SEND EMAILS For simple trading strategies, just send us an email when it's time to trade, and we'll copy your buys and sells into your subscribers' brokerage accounts.	06. TRADESTATION, NINJATRADER, METATRADER, OR MULTICARTHS Collective2 is compatible with popular third-party trading applications, so you can develop your trading strategy using software you are already familiar with.

[BECOME TRADE LEADER](#)

Integration of Block Chain with Artificial Intelligence Technology Continuous Enhancement of Customer Experience

Iquant chain, as a intelligent investment consultancy platform, will provide mass strategies for investors to choose, make portfolio and to follow. These massive quantitative trading strategies will all go through intelligent filtering mechanism, and be presented on basis of big data investment model and artificial intelligence technology. Via simple interfaces, investors can follow several strategies at the same time and set their own options of profit and loss contract. Without keeping an eye on the platform, our users can maximize their profits and minimize the loss.

● VI. Market Prospects ●

1. Profit Model Proved to be Mature

As the world top-class quantitative platform, we have already established mature business pattern. Quantitative trading service of digital assets will land at the major global platforms and the pattern is increasingly clear and mature.

2. Abundant Usage Scenario of IQT and its Scarcity Stimulating Appreciation

On one hand, the circulation amount of IQT will be constant; on the other hand, its usage scenario is so abundant that all the service fees at the platform can be paid with it. The expanding recognition of the huge user base confronting the scarcity of the resource will definitely stimulate its appreciation.

3. Global Financial and Digital Assets Market Connecting Huge User Base Platform

Iquant chain will connect the global actual investors with digital currency. Numerous investors and professional traders of stocks, futures, foreign exchange and share option from all over the world have registered at our platform and this group of people are exactly the potential users and investors of IQT.

4. Simplified Investment Pattern Meeting Market Demands

Investment pattern will be simplified to be ordinary-investors-friendly with push-button following function, with independent options of stop-profit point, loss limit and followed transaction percentage. This sound service system for both ordinary investors and professional traders can safeguard their assets safety and management convenience. Facing the enormous digital assets market, IQT has tremendous potential of usage and appreciation.

5. Block Chain Technology Providing Resolution to Payment Pain Point

The usual trading systems are lack of trust mechanism, while Iquant chain, embedded with block chain technology, can realize the transparency of trading strategies and reduction of error rate occurred in order-following process with smart contract. Moreover, within the clear set usage scenarios, IQT as the unified payment instrument for platform users all over the world will be a resolution to the pain point of cross-border payment.

6. Innovation Continuously Reducing the Cost to Obtain Customers and Enhancing Experience

The innovated application of big data integrating with artificial intelligence will continuously reduce the cost for the platform to obtain customers. For example, through intelligent push at social network, link sharing, invitations and rewards, the spread effect of internet can successfully promote IQT to more customers. Meanwhile, the customer experience can be enhanced steadily.

VII. Team Introduction

Till now, the core team of Iquant chain consists of elites from all around the world. Taking technology as the base, service as the shield and block chain as the lance, we are full of enthusiasm towards this industry and devoted to establish a globalized, diversified, convenient, safe and intelligent investment consultancy system of digital assets for investors to address their needs of one-stop block chain investment.

Mr. Leo Chen

Iquant Chian CEO

As the founder and Chief Marketing Officer of 5iquid, Chen is a senior financial expert who has in-depth study and experience on global asset allocation and quantitative trading. Skilled in big data mining and analyzing, experienced in digital currency trading and has more than 5 years senior management experience in Fortune 500 companies.

Mr. Tony Hu Iquant Chain Co-founder COO

Co-founder as well as COO of 5iquid, majored in Administration of Industrial and Commercial Enterprise and started business since Y2008, he is highly experienced in global market investment, quantitative model investment and digital currency investment, and also practically experienced in market research, channel construction, commercial cooperation and business model. Serving many years as senior executives in listed companies, he is a strong supporter and researcher of block chain industry.

VII. Team Introduction

Mr. Matthew Klein Iquant CTO

As the founder of Collective2 and a pioneer in block chain industry, he has considerably thorough research on the quantitative trading of global stock, futures, option and foreign exchange as well as related system construction and trading strategies, and knows well about the development of global quantitative trading industry especially overseas.

Ms. Fernanda Parisi Iquant Senior Consultant

Doctor of Engineering from University of Minnesota in USA, she has been employed as R&D engineer or technology expert in several high-tech companies such as Google, Qualcomm and Bloomberg and has acquired rich experience on computer system design, product development and engineering project management. Based on her learnings about block chain technology and digital currency, her current research focuses on the application of combination of quantitative trading and block chain technology in financial market.

● VIII. Our Strengths ●

1. Internationalized All–Star Team

Developing and operating team consist of masters and experts in block chain and quantitative field from all over the world.

2. World Top–class Quantitative Platform Connecting Iquant Chain Application

The landing platform of Iquant chain is one of the world's top trading systems, which allows transactions of global financial objects at multiple platforms in several languages. Furthermore, the customer experience on this platform is excellent and its core technology is in the lead around the world.

3. Internationalized Operating and Consultant Team

Abundant resources and partners provide liquidity and support for platform operation.

4. Existing Huge User Base

Currently the application platform of Iquant chain has already acquired more than 230,000 professional traders and 73,000 trading strategies, who are the potential users and investors of IQT.

IX. ICO Scheme

Iquant chain (IQT), as the platform token, will be supplied constantly 100 million in total and never be supplemented.

Offering Method

It is expected to be issued via 2 series, 10% to be offered in Pre-ICO, 30% in ICO, 10% as the returns for early-bird investors, 15% for marketing promotion rewards and community rewards, and the rest 35% to be held by the founding team whose lock-up period lasts 2 years.

Proportion	Distribution Scheme	Description
(10) %	Pre-ICO	The exchanged ETH by public offering will be used to develop the Iquant Chain Intelligent Advisor System, including Block-chain development, marketing and promotion, technology research etc.
(30) %	ICO	Offering on official website for the investor all around the world.
(35) %	Founding Team	To be held by founding team in the early stage and IQT will be the returns upon their future contribution, whose lock-up period is 2 years.
(15) %	Marketing promotion rewards and Community Rewards	No more than 15% tokens as marketing promotion rewards and community rewards, which will not be locked up.
(10) %	Early-bird Investors	Early-bird investors consist of many entrepreneurs in the industry and senior investors who have provided lots of help for the development and launch of Iquant Chain platform including but not limited to their financial, human and material resources, so this portion will be their returns.

What is the value resource of Iquant chain?

Iquant chain is the operation base of the entire global platform. When the platform serves the investors and professional traders, it has to charge certain amount of IQT as the “fuel”.

Platform users will naturally purchase IQT when using the services, thus maintain the value of IQT and promote its appreciation. Just like that when people need to use BTC for exchange, they have to purchase it in the market, and when the amount of users of BTC increase, the price of which will naturally climb up.

Upon the global block chain trading platform, Iquant chain architecture provides better operation experience for global block chain users and investors. Theoretically speaking, current hundreds of millions of global financial investors and millions of block chain investors are the potential users of Iquant chain, and along with the continuous extension of each block chain assets community, the users' amount will embrace explosive growth.

Purpose of ICO Proceeds

For the time being, Iquant chain has finished the development of entire top architecture, while that of the underlying architecture is at the initial stage, so the proceeds of ICO will mainly be used to develop and integrate the overall system of Iquant chain and underlying architecture of block chain system. The rest part will be used for brand construction, operation and communication, including generalizing continuously the block chain industry and Iquant chain platform and providing financial support for marketing events to acquire market recognition and to accumulative trading users.

ICO Regulations

ICO: exchange by ETH IQT offering limit: 30 million IQT	Total raising number: 33000ETH
Starting time	20:00 25 th Septemer, 2017 (China Standard Time)
Ending time	20:00 25 th November, 2017 (China Standard Time)
ICO address	http://www.5iquant.org
Exchange rules	China Standard Time From 2017-09-25 To 2017-09-30 : 1 ETH = 900 IQT From 2017-10-01 To 2017-10-10 : 1 ETH = 850 IQT From 2017-10-11 To 2017-10-20 : 1 ETH = 800 IQT From 2017-10-21 To 2017-11-25 : 1 ETH = 700 IQT

X. Developing Roadmap

● XI. FAQ and Risk Warning ●

Unless you yourself know about the developing route of Iquant chain and understand the risks in block chain industry, you are not advised to participate in the open exchange of Iquant chain! Crypto currency is still in its early stage of development in high-risk industry, so the investment and participation in it requires your absolute discretion and carefulness. Once exchanged, your original coins will never be withdrawn! This project may fall into failure due to its legality, market demands, technical or other uncontrolled reasons, whose worst consequence may be that your investment of BTC or other tokens never returned.

1. What is the official website address of I quant?

www.5iquant.org

2. What is the token for Iquant chain?

Iquant chain, provisional code is IQT.

3. Is there any group chat to discuss about IQT open exchange?

slack —— iqt-group.slack.com

Telegram —— iQuantChain

Twitter —— iQuantChain

Facebook —— Ying Quant

Bitcointalk —— iqt

4. When will Iquant chain starts open exchange?

Iquant chain ICO will kick-off at 20:00 25th September, 2017(China Standard Time), and will end at 20:00 25th November, 2017(China Standard Time). The target of offered amount of IQT for ICO is 30 million. It is estimated that totally 33000 ETH will be raised during ICO crowd funding, and the minimum target of crowd funding is 6000ETH.

5. What is the total circulation amount of IQT and will that be supplemented in the future?

The total supplied amount is 100 million, without any supplement.

• XI. FAQ and Risk Warning •

CoinExchange

12. Risk Warning

Unless you yourself know about the developing route of Iquant chain and understand the risks in block chain industry, you are not advised to participate in the open exchange of Iquant chain! Crypto currency is still in its early stage of development in high-risk industry, so the investment and participation in it requires your absolute discretion and carefulness. Once exchanged, your original coins will never be withdrawn! This project may fall into failure due to its legality, market demands, technical or other uncontrolled reasons, whose worst consequence may be that your investment of BTC or other tokens never returned.

● XI. FAQ and Risk Warning ●

6. What is the value resource of Iquant chain?

Iquant chain is the operation base of the entire global platform. When the platform serves the investors and professional traders, it has to charge certain amount of IQT as the “fuel”.

Platform users will naturally purchase IQT when using the services, thus maintain the value of IQT and promote its appreciation. Just like that when people need to use BTC for exchange, they have to purchase it in the market, and when the amount of users of BTC increase, the price of which will naturally climb up.

Upon the global block chain trading platform, Iquant chain architecture provides better operation experience for global block chain users and investors. Theoretically speaking, current hundreds of millions of global financial investors and millions of block chain investors are the potential users of Iquant chain and along with the continuous extension of each block chain assets community, the users’ amount will embrace explosive growth.

7. Which crypto currencies can be used for IQT open exchange?

BTC and ETH can both be used.

8. What is the price of IQT? Is there any incentive policy?

For the amount of IQT could be exchanged by ETH, please refer to the description in ICO regulations, and for detailed incentive policy please refer to the official site www.5iquant.org.

9. What is the angel investment?

The angel funding of Iquant chain happened in 2016. This project would not be launched without the initial support from these business angels, including the masters from various industries, founders in the industry and our co-founders, who have seen the good prospects of Iquant chain team and invest the project.

10. After ICO, when will the tokens be issued? When will these be traded and in which exchanges?

After ICO, the IQT token will be distributed, it is expected that the IQT to be listed on some big exchanges, the details of trade exchanges will be announce once it is determined. Currently, IQT is listed on below exchanges.
